WORK EXPERIENCE

Full Stack Engineer

Neosoft Technologies (CMM-5) [🔗](#)

10/2018 – Present

Client: Mahindra and Mahindra Ltd.

Achievements/Tasks

- Leading a team of three peoples. I have used tech stack including Angular, Node JS, MongoDB, Redis, RabbitMQ, NGINX, Docker
- Developing a chat bot framework for qlik sense applications. Chat bot framework is fully configurable, like menus, messages, alerts, comment, qlik side configurations are made available to change or update in admin panel.
- Able to set up whole different bot in a single day for another application.

Software Engineer

63 Moons Technologies India Limited [🔗](#)

03/2017 – 10/2018

India's No 1 Stock Exchange Trading Platform Provider

Achievements/Tasks

- Herewith I am working for a SMC Global Project. My main responsibility has been to develop reusable angular components. I have used tech stack including Angular, MSSQL, C# Web API, IIS.
- Analytics Module was developed in which I am actively playing an important role as I have developed a dashboards for Equity, Commodity, Futures and Options, Currency, and Fundamentals as a single unit. Each dashboard consist of more than 15 widgets.
- Actively involved in developing and architecting of Analytics Engine based on Redis Cache I was a team member for developing Advance Chart and Technical Indicators.
