Java Concept 43

- From Java 8 static methods and static variable can be made inside interface

```java
1   //No Error Java 8
2   //Error Java 7
3   interface Java
4   {
5       static int var = 10;
6       static void show()
7       {
8
9       }
10 }
```

```java
1   //Code Run java version 8 and beyond
2   interface Employee
3   {
4       static int salary  = 4000;
5       static void  display()
6       {
7         System.out.println("Starting Salary "
8                 + "of Programmer : "+salary);
9       }
10 }
11 public class JavaConcept implements Employee
12 {
13     public static void main(String args[])
14       {
15         JavaConcept obj = new JavaConcept();
16         Employee.display();
17       }
18 }
```

```
run:
Starting Salary of Programmer : 4000
BUILD SUCCESSFUL (total time: 0 seconds)
```
