Java Concept 2

- Non Static methods cannot be called from Static methods

```
1   //Error
2   class pc
3   {
4      static void click()
5      {
6         mouse();
7      }
8      void mouse()
9      {...}
12  }
```

```
1   //Calling Static methods from static methods //No Error
2   class JavaConcept {
3       public static void main(String args[]) {
4           System.out.println("Calling Static method : "+fun());
5       }
6       static int fun() {
7           return 100;
8       }
9   }
```
run:
Calling Static method : 100

```
1   //Calling Non Static methods from static methods // Error
2   class JavaConcept {
3       public static void main(String args[]) {
4           System.out.println("Calling Non Static method : "+fun());
5       }
6       int fun() {
7           return 100;
8       }
9   }
```
Error- non-static method fun() cannot be referenced from a static context
